

# What makes a business successful?

That is the question our Functional Skills girls took to Morrisons supermarket on their very own organised trip. They had lots of fun learning what went on in the supermarket. They proceeded to display initiative by putting together a wonderful PowerPoint presentation of the trip with a summary of all the helpful information they had acquired and pictures of themselves at the supermarket smiling. According to the girls, to be successful you need courage, a good sense of humour and money. The girls continue to state that location, products, special offers and customer service are key factors in driving a business to success. Well done, girls!
